Aisha Sharma · Senior Machine Learning Engineer

PROFESSIONAL SUMMARY

Senior Machine Learning Engineer with 6+ years of experience in architecting NLP models, productionizing Deep Learning systems, and implementing Retrieval-Augmented Generation (RAG). Proven track record scaling PyTorch and Scikit-Learn pipelines to millions of daily inference calls.

CORE TECHNICAL SKILLS

Languages & Frameworks: Python, PyTorch, Scikit-Learn, TensorFlow, Pandas, NumPy, Keras
AI / ML Specializations: Machine Learning, Deep Learning, Natural Language Processing (NLP), Transformers, Large Language Models (LLMs), RAG, Prompt Engineering, Model Evaluation
Engineering & Cloud: Docker, Kubernetes, REST API, Git, GitHub Actions, Linux, AWS (S3, EC2, Lambda)
Methodologies: Agile, Scrum, Unit Testing with Pytest, Microservices Architecture

PROFESSIONAL EXPERIENCE

Lead AI Engineer | Synapse Analytics (2021 - Present)
- Designed enterprise RAG question-answering system using Hugging Face Transformers and PyTorch.
- Reduced model latency by 45% containerizing inference services using Docker and FastAPI REST APIs.
- Mentored team of 5 data scientists and implemented automated CI/CD unit testing with Pytest.

Machine Learning Scientist | DataFlow Labs (2018 - 2021)
- Built tabular predictive pipelines using Scikit-Learn, XGBoost, Pandas, and NumPy.
- Engineered end-to-end NLP text classification workflows processing 500k+ documents monthly.

EDUCATION & CERTIFICATIONS

M.S. in Computer Science (Artificial Intelligence) · Stanford University
AWS Certified Machine Learning Specialist
