Marcus Vance · Cloud & DevOps Infrastructure Engineer

PROFESSIONAL SUMMARY

Infrastructure and DevOps Engineer with 6 years experience automating cloud platforms on AWS. Specialist in Infrastructure as Code (Terraform), Kubernetes cluster orchestration, Docker containerization, and robust CI/CD pipeline automation with Git and Linux Shell scripting.

TECHNICAL SKILLS

Cloud Providers: AWS (EC2, S3, EKS, Lambda, IAM), Google Cloud Platform (GCP)
Containers & Orchestration: Docker, Kubernetes, Helm
Automation & CI/CD: Terraform, Ansible, CI/CD, GitHub Actions, Jenkins, Git
OS & Scripting: Linux (Ubuntu, RHEL), Shell / Bash, Python, PowerShell
Monitoring & Practices: Prometheus, Grafana, Microservices, Agile

EXPERIENCE

Lead DevOps Engineer | CloudScale Networks (2020 - Present)
- Provisioned multi-region AWS cloud infrastructure using modular Terraform scripts.
- Migrated monolithic workloads to Kubernetes (EKS) and Docker, cutting compute costs by 35%.
- Engineered end-to-end CI/CD pipelines deploying microservices across testing and production environments.

Systems & Cloud Administrator | Horizon Telecom (2018 - 2020)
- Administered 200+ Linux enterprise servers and automated routine health checks with Python and Bash.
- Managed Git repository branching strategies and assisted developers with container troubleshooting.

EDUCATION & CERTIFICATIONS

B.S. in Information Systems · Purdue University
AWS Certified Solutions Architect · Professional
Certified Kubernetes Administrator (CKA)
